EDWIN JUST BUTIAL TEOXON

Brgy. San Gabriel, San Pablo City, Laguna | tedwinjust@gmail.com | 0966-945-3874
Portfolio: edwinjust.netlify.app | GitHub: github.com/Dwin03 | LinkedIn: linkedin.com/in/edwin-just-teoxon

Career Objective

Entry-Level IT Professional with hands-on experience in software development, technical troubleshooting, system testing, debugging, and database management through internship and academic projects. Skilled in developing and supporting web and mobile applications while diagnosing and resolving technical issues. Seeking an entry-level role where I can apply my technical and problem-solving skills.

Technical Skills

- Tech Support: Troubleshooting, Debugging, Software Support, QA Testing, Issue Resolution
- Programming Languages: Python, Kotlin, Java, C++
- Web Development: HTML, CSS, JavaScript
- Mobile App Development: Kotlin, XML
- Database: PostgreSQL, SQLite, MySQL, Room Database, Firebase
- Tools: Git, GitHub, VS Code, Android Studio, PyCharm

Experiences

IT Intern / Developer – Rizal RHU (February 2025 – June 2025)
Full Stack Software Developer | Technical Support | System Troubleshooting | QA Testing

- Developed multiple web and mobile systems, improving workflow efficiency by handling full-stack development, backend logic, and QA testing.
- Built and integrated frontend and backend features, ensuring smooth system performance
- Conducted testing and debugging to improve reliability and reduce system errors

Freelance Developer – Alumni Tracker (October 2025 – December 2025)
Frontend & Backend Developer

Tech Stack: Python, Kivy, Firebase

- Built a system for tracking and managing alumni records
- Integrated Firebase for real-time database management and data synchronization
- Developed features for efficient data retrieval and user interaction

Projects

Steno Interpreter (Capstone Project)
Project Manager & Developer

Tech Stack: Kotlin, XML, SQLite, TensorFlow Lite (TFLite), HTML, CSS, PHP

- Developed a mobile application to help students learn shorthand through interactive features
- Integrated a TensorFlow Lite model for shorthand recognition
- Built a supporting web platform for content access and system integration
- Led the development team, managed task distribution, and ensured timely project completion

e-BIDA Mo! (Internship / OJT Project)
Full Stack Developer (Sole Developer)

Tech Stack: Kotlin, XML, Google Sheets (as a used as a lightweight database)

- Designed and developed a mobile health tracking application for barangay health workers and residents
- Built both frontend interface and backend logic independently
- Implemented features for recording and monitoring health data

Issuance of Sanitary Permit System (Internship / OJT Project)
Backend Developer & QA Tester

Tech Stack: HTML, CSS, JavaScript

- Developed backend logic for automating sanitary permit processing
- Performed quality assurance testing to ensure system reliability and accuracy
- Improved efficiency of permit generation compared to manual processes

Household Profiling System (Internship / OJT Project)
Frontend Developer & QA Tester

Tech Stack: HTML, CSS, Tailwind, Python

- Developed responsive user interfaces for a household data profiling system
- Conducted quality assurance testing to ensure data accuracy and system reliability
- Assisted in managing structured household data for community-level record keeping

Awards and Recognition

Best Intern 2025 – Awarded during Recognition Day for outstanding performance and contribution during internship.

Personal Skills

- Problem Solving & Debugging
- Team Collaboration using Agile
- Adaptability & Flexibility
- Attention to detail
- Fast Learner & Initiative
- Time Management & Goal Orientation
- Resilience Under pressure
- Continuous Learning & Improvement

Education

Bachelor of Science in Information Technology – Major in Software Development
Pamantasan ng Lungsod ng San Pablo, 2021-2025
